

Draft Work Plan for Strengthening Institutional and Policy Framework on DRR and CCA Integration

Group Work Sheet: Cambodia

1. Objective

To significantly reduce disaster risk and increase resiliency by integrating DRR and CCA through the following joint activities and knowledge sharing on DRR and CCA among ASEAN members states.

- Raising public awareness of DRR and CCA
- Creating regional funding mechanism for integration of DRR and CCA
- Building capacity to strengthen institutional and policy framework on DRR and CC through the regional training opportunities;
- Establishing an ASEAN cross-sectoral collaboration mechanism to develop recommendations on the policy and implementation of DRR and CCA at the national and regional levels; and
- Sharing good practices including data sharing platform among ASEAM member states

5. Implementation structure

a. Working Group on Prevention and Mitigation

The WG on P&M is responsible for:

- Compilation and procession of the Information and knowledge collected from the Member States, sharing it among them and reporting it to the ACDM Meeting;
- Coordination and facilitation of mutual cooperation activities among the Member States by referring to their annual reviews and by using local resources; and
- Sharing regional needs for DRR and CCA integration with development partners and developing regional programmes with them.
- Fund Raising on DRR and CCA integration
- Introducing of New Technologies
- Data Management
- Regional Training Programme

b. ACDM National Focal Point

Each ACDM National Focal Point collects relevant information listed in Table 1 from line agencies, reviews it and reports it to the WG on P&M annually with particular focuses on:

- Monitoring of Implementation of Inregation of DRR and CCA under Current NSDP 2014-2018
- Progress of Formulation of New NSDP 2019-2023
- Progress of Disseminating and Enforcement of Disaster Management Law 2015
- Exploring Possibilities of Consolidated Climate Change Law
- Research on Possible Collaboration between NCCC and NCDM
- Orgnazational Structure of Disaster Management
- Monitoing of Use of DRR-related Expenditure of Each Line Ministry, if possible
- Sharing Disaster Database, Hydro-met Data, Hazard and Risk Maps and their Technologies
- Enforcement of Early Waning System
- Reporting on Formulation of Guidelines and Standards

- Management of disaster, hydro-meteorological, risk, vulnerability and socio-economic data and sharing of them with relevant agencies for synthetic analysis;
- Reviewing of DRR and CCA related plans and activities for close coordination and knowledge sharing among relevant agencies; and
- Capacity building and needs assessment based on the reviewing results, development of training programmes using domestic resources, and recommendation of resource institutions and agencies possible to provide capacity building services regionally.

6. Immediate collaborative activities

Following immediate collaborative activities will be implemented from 2018 under the Work Plan:

Fund raising

Data Sharing

7. Further challenges

In order to strengthen DRR and CCA integration further beyond this Work Plan, following activities shall be planned in parallel:

Each ASEAN Member State:

Human Resources Development

Working Group on Prevention and Mitigation:

Table1 DRR and CCA activities to be implemented and reported by each ASEAN Member State

Activities		Review points
1. Institutional and policy development		
1.1 Policies, laws and regulations	National socio-economic development plan	<i>Monitoring of Implementation of Inregration of DRR and CCA under Current NSDP 2014-2018</i> <i>Progress of Formulation of New NSDP 2019-2023</i>
	DRR and CCA laws and regulations	<i>Progress of Disseminating and Enforcement of Disaster Management Law 2015</i> <i>Exploring Possibilities of Consolidated Climate Change Law</i>
	DRR and CCA related sectoral laws and regulations	<i>The enforcement of forestry law 2002</i> <i>Enactment of Draft Law on Water Resources Management</i>
1.2 Management system	National and subnational DRR and CCA management systems	<i>Research on Possible Collaboration between NCCC and NCDM</i> <i>Orgnazational Structure of Disaster Management</i>
1.3 Financial arrangement	Regular budgetary arrangements of line ministries for DRR and CCA	<i>Monitoing of Use of DRR-related Expenditure of Each Line Ministry, if possible</i>
	Special funds for local and community-based DRR and CCA activities	No
	Payment for ecosystem services and insurance scheme	No
2. Risk assessment		
2.1 Climate change impact analysis	Observation and analysis of hydro-meteorological data	<i>Sharing Disaster Database, Hydro-met Data, Hazard and Risk Maps and their Technologies</i>
	Climate change projection	<i>Future Downscaling from Global Climate Models</i>
	Standard values of CC impact	
2.2 Hazard and risk mapping	Hazard and risk mapping of flood, storm surge, landslide and drought	<i>Sharing Hazard and Risk Maps and their Technologies</i>
3. Planning and implementation*		
3.1 Disaster risk reduction	DRR plans and implemented projects for flood, storm surge, landslide and drought	<i>Capacity building and needs assessment based on the reviewing results, development of training programmes using domestic resources, and recommendation of resource institutions and agencies possible to provide capacity building services regionally.</i>
3.2 Standard guideline for disaster and climate risk assessment and planning		<i>Reporting on Formulation of Guidelines and Standards</i>

* Planning and implementation of DRR steps are merged here as the review points for both steps are similar.
